Achmad Firdaus
Adinegoro

Frontend Developer • AI Developer • Graphic Designer • Freelancer

Hello!

I'm **Achmad Firdaus Adinegoro**

I'm a result-oriented technology professional with proven versatility across **web development, machine learning, and graphic design**.

Consistently delivers high-quality work on time, demonstrating a strong ability to quickly master new technologies and domains.

Skills

Tech

ReactJS, NextJS, HTML, CSS & SCSS, Javascript, Typescript, Material UI, MUI X, Tailwind CSS, Git, GraphQL, hasura, RESTful API, Python, Jupyter Notebook, Java, NumPy, pandas, matplotlib, Websocket, Bootstrap, React Bootstrap.

UI/UX

Figma, Adobe XD

Design

Adobe Creative Suite, Affinity

Work Experience

► Frontend Developer

Azoo Inc. (Wasimil) · Kyoto, Japan (Remote)
May 2023 – Oct 2025

► Frontend Developer

PT. Visi Prima Nusantara · Jakarta, Indonesia
Feb 2021 – May 2023

► AI Software Engineer

PT. Solusi Teknologi Cerdas · Jakarta, Indonesia (Remote)
May 2023 – Oct 2025

► Game Designer, UI/UX, Level Designer Intern

Vifth Floor · Depok, Indonesia
Jun 2017 – Jun 2018

► Assistant Lecturer

Faculty of Computer Science, Universitas Indonesia
Jan 2017 – Jun 2018 · Depok, Indonesia

► Graphic Designer Intern

Faculty of Computer Science, Universitas Indonesia
Jun 2016 – Nov 2016 · Depok, Indonesia

Education

► Universitas Indonesia

Computer Science · Bachelor of Science
GPA: 3.71 / 4.00

My Works

Web-based Widget Design and Coding Commissions

Web Development & Graphic Design

Sole Developer, Designer

2020 - Now

Description

Working on various commission and project to design and implement a widget web-app for a game called "osu!".

How does it work?

The app takes real-time data (using websocket) from the game to a more presentable viewer friendly design for various streamer using HTML, CSS, and JavaScript.

Use Case

These web-based widget can be used for individual streamers to enhance their personal streaming branding, while also showing the game stats in real-time, further enhancing streamers-audience interactions.

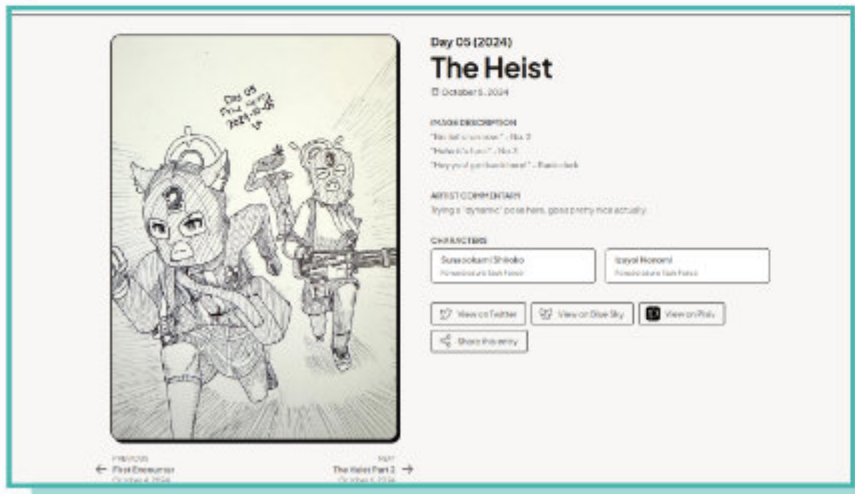

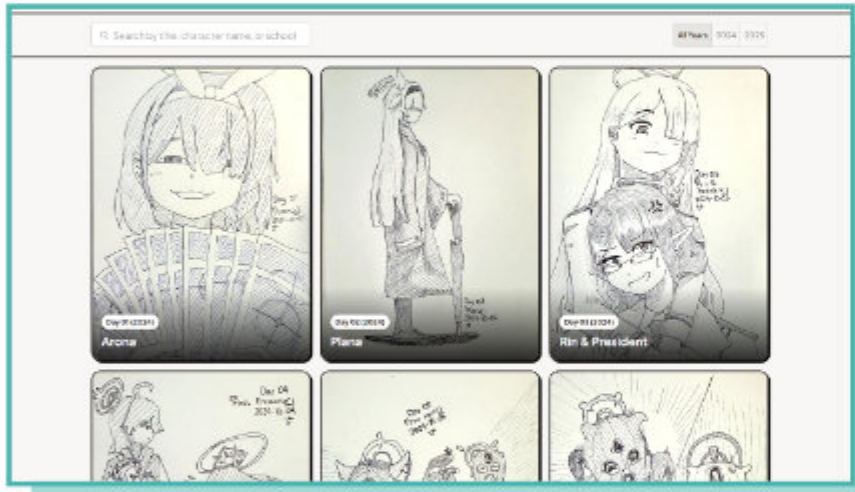

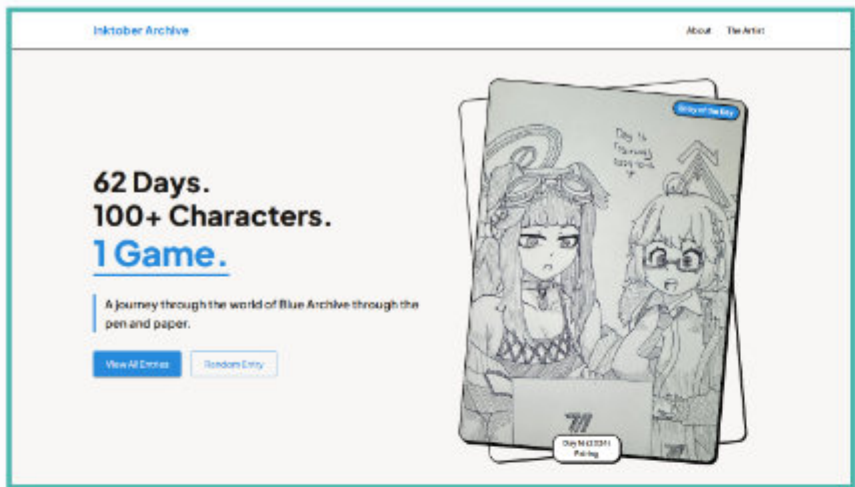

These type of widget can also be used for game tournaments, where two or more people played the game head-to-head to achieve higher score. This widget enables tournament organizers to have more custom design on their tournament, while also ensure their tournament's branding is consistent.

Notable Projects and Clients

- **WhiteCat** (Former osu! #1 player)
- **Kachulu** (one of the biggest osu! content creator)
- **osu! Indonesia Tournament 2023, 2024, and 2025** (osu! National Tournament)
- **Ascaveth Invitational Tournament 2023 & 2024** (Biggest local LAN Tournament)

Notable Technologies:

Vanilla JS, CSS, websocket, Adobe Illustrator, Adobe Photoshop

Inktober Archive

<https://ba-ink.victim-crasher.com/>

Web Development
Sole Developer
2025

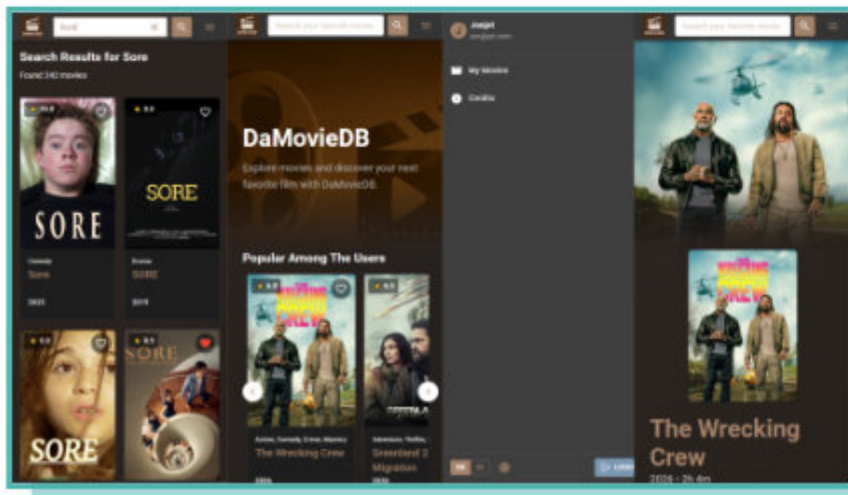

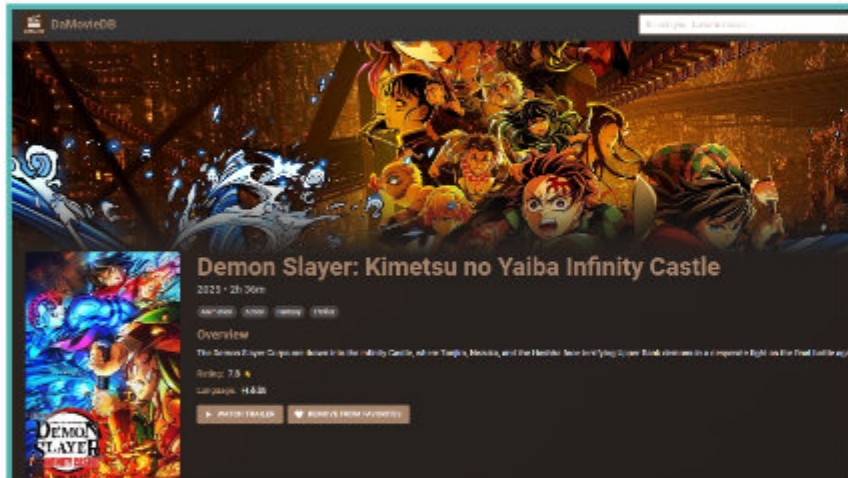

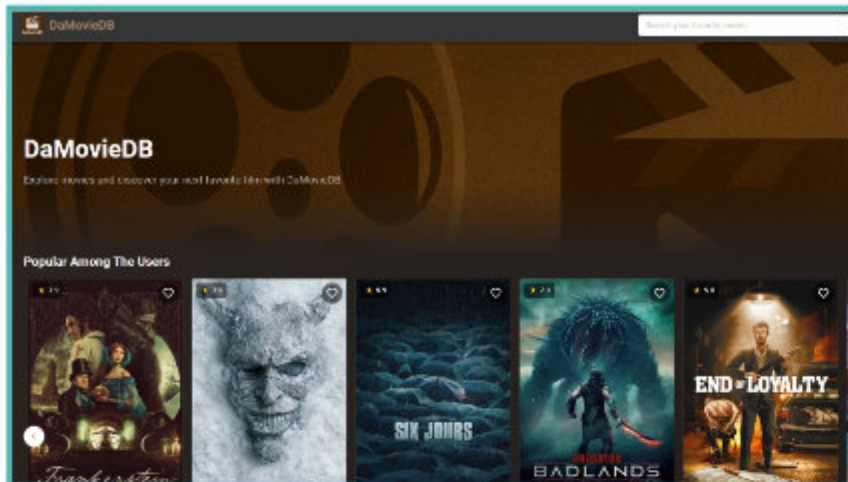

Description

Inktober Archive is a website to showcase my personal Inktober drawings, specifically themed around the game Blue Archive.

This project also started for me to learn new technology stack such as NextJS and Tailwind CSS.

Notable Technologies:

NextJS, ReactJS, Tailwind CSS, Material UI, Typescript

DaMovieDB

<https://vic-movies-app.web.app/>

Web Development
Sole Developer
2025

Description

A responsive movie database website that allows users to search for movies, view details, and add them to their watchlist with authentication handled by Firebase.

Creates the whole application from the ground up. (Powered by the TMDB API)

Notable Technologies:

ReactJS, Material UI, Typescript, Firebase

Wasimil Guest Portal

Web Development

Feature Lead and Main Front-end Developer

2023 - 2025

Description

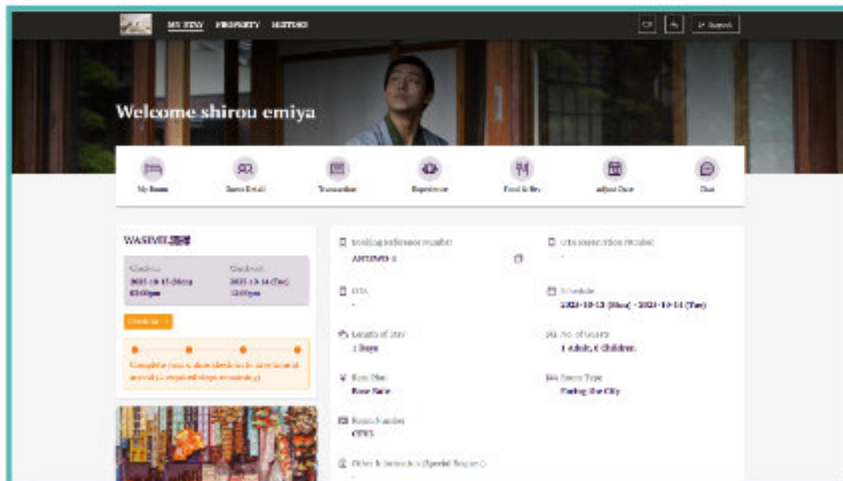

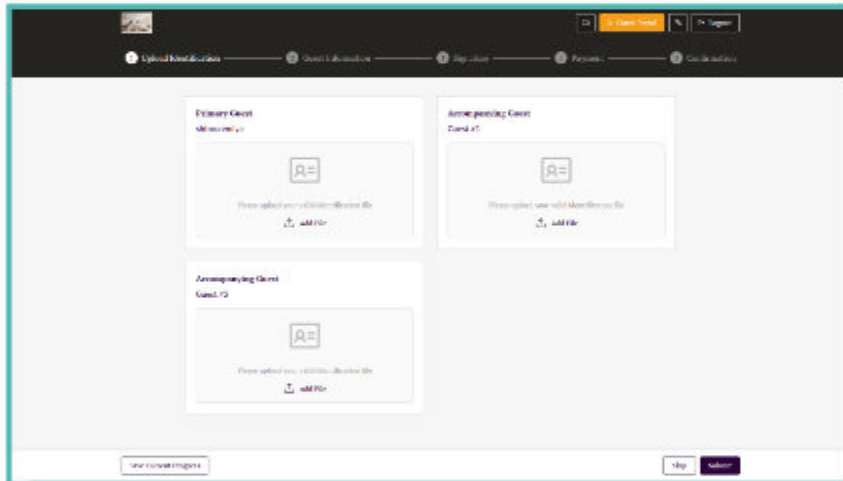

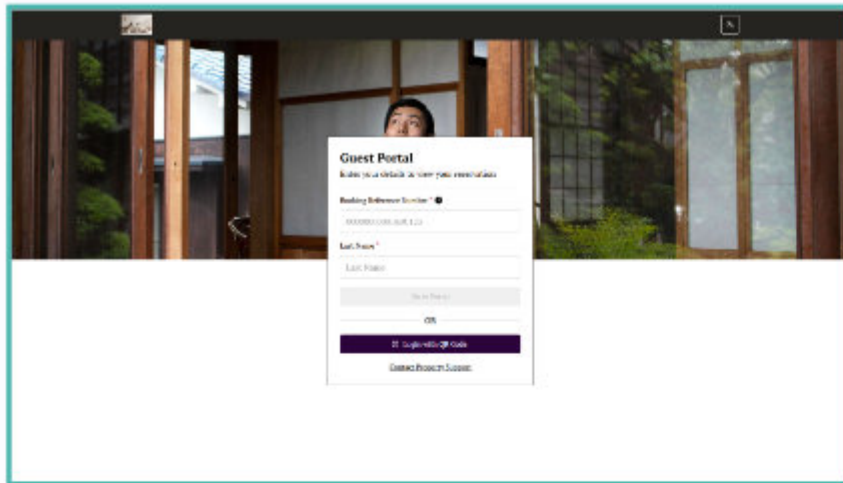

This project was part of my work in **Wasimil**.

A guest portal for hotel guest, allowing guests to do online check in and view their stay information on the comfort of their own home.

Consists of state-of-art technology, while also being a pioneer of many new technologies. Wasimil Guest Portal ensures the most convenient online check-in experience.

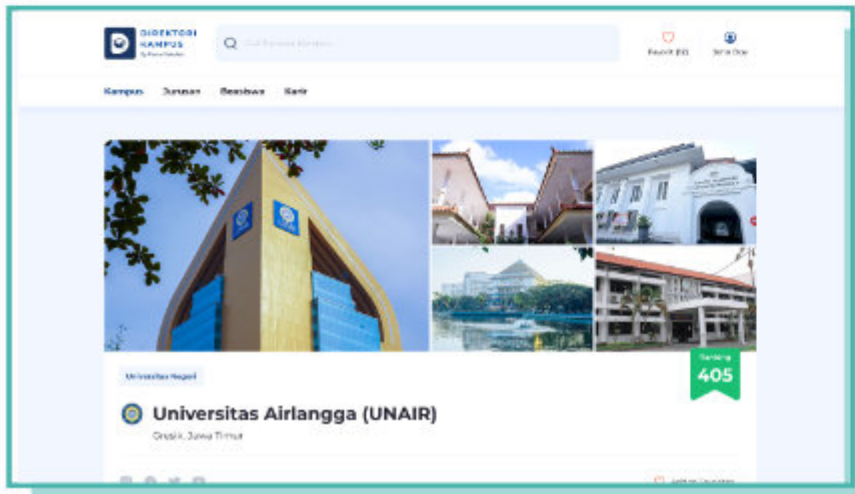

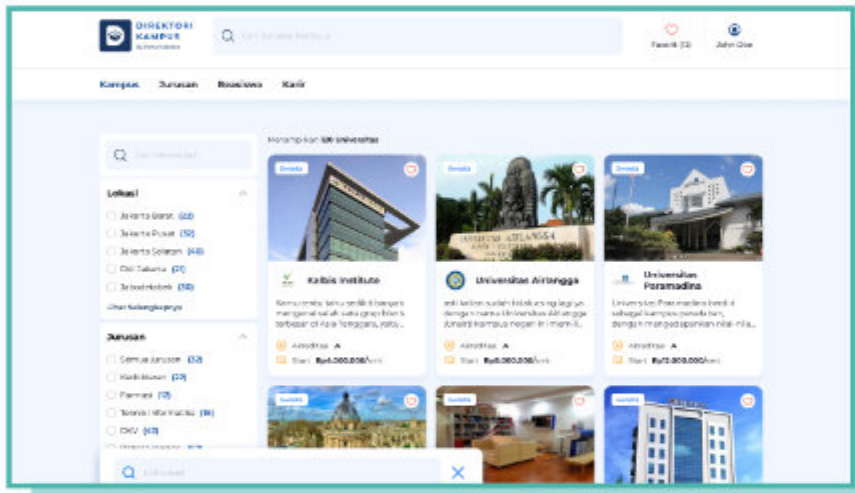

This portal is customizable, the property can customize their own base color and many component definition to fit their properties' design guideline consistently in all device type.

Contributed as a initial app developer, creating and maintaining the application from the ground up.

Notable Technologies:

ReactJS, Material UI, GraphQL

Direktori Kampus

Web Development
PIC and Founding Front-end Developer
2023

Description

This project was part of my work in **PT. Visi Prima Nusantara**.

A gateway for students to get college information for both domestic and abroad. This responsive website lists universities, major, career, and scholarship information, all in one place.

Responsible on creating and maintaining the application from the ground up. Working together with UI/UX designer, backend team, and backend to deliver the application in record time while still preserving quality and integrity of the application.

Notable Technologies:
ReactJS, Bootstrap, scss

Calibration-less Crowd Analytics

Artificial Intelligence
Lead Developer
2020

Description

This project was part of my work in **Delligence AI**.

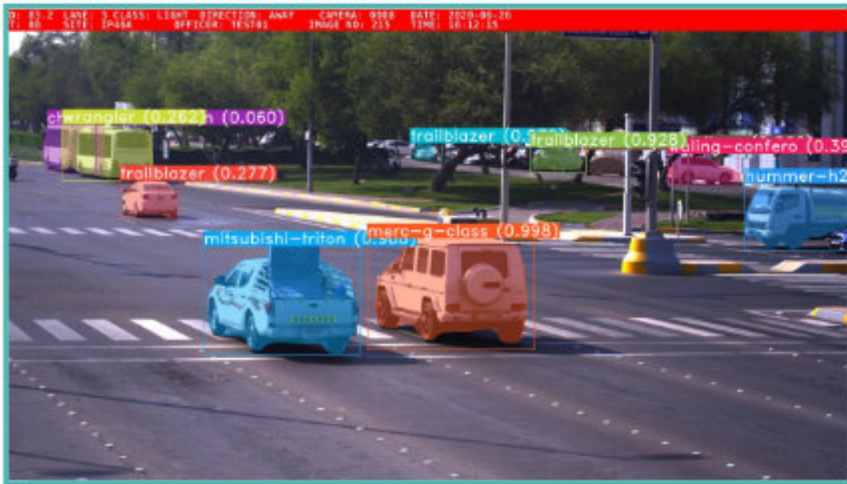

Involved in multiple machine learning models for Crowd Analytics:

- People counting,
- Gender inference,
- Mask compliance,
- Social distancing violation detection,
- Helmet compliance.

Can be run without any calibration, and can be used on any video and devices.

Notable Technologies:

python, keras, tensorflow, OpenCV

Vehicle Analytics Detection

Artificial Intelligence
Lead Developer and Researcher
2020

Description

This project was part of my work in **Delligence AI**.

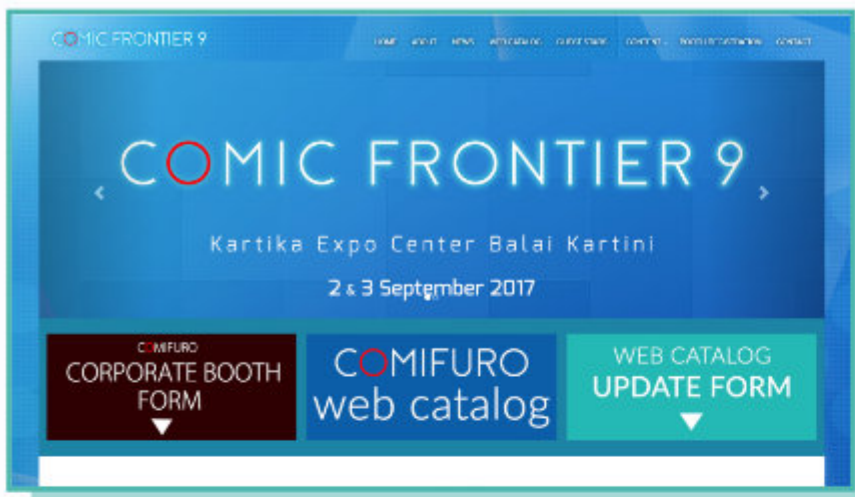

Combination of Computer Vision and Machine Learning to detect multiple vehicle information such as:

- Vehicle brand,
- Vehicle model,
- Vehicle color,
- Vehicle's license plate,
- Vehicle luxury classifications, and more.

The model supports 200+ brand and model, license plate location inference (location, odd/even detection) for Indonesian license plate, also additional support for UAE license plate.

Notable Technologies:

python, keras, tensorflow, OpenCV

Comic Frontier 9 Website Redesign

Web Development
Sole Developer
2017

Description

Redesign the website of the biggest community led pop-culture event in Indonesia, Comic Frontier 9 (2017).

Also contributed in the development of the web catalog page, which becomes the inspiration for the subsequent event iterations.

Notable Technologies:

HTML, CSS, Vanilla JS, Bootstrap, PHP

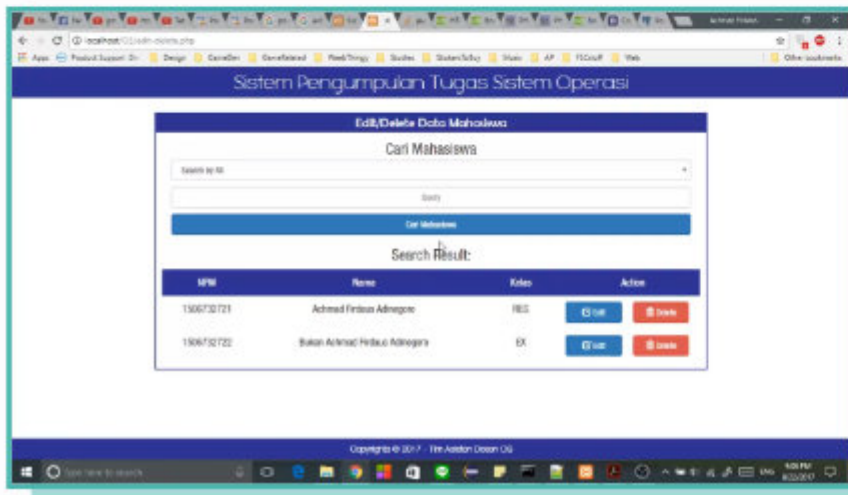

QR-based Task Collection System

Web Development
Sole Developer
2017

Description

A POC for a system to collect tasks from students using QR code.

The system will generate a QR code for each task and students, which will be used for identification when they collect the task.

Notable Technologies:

HTML, CSS, Vanilla JS, Bootstrap, PHP, PostgreSQL

Blip Blob

Game Development

UI Designer, UI Developer, Asset Artist, Promotional Designer

Date

Description

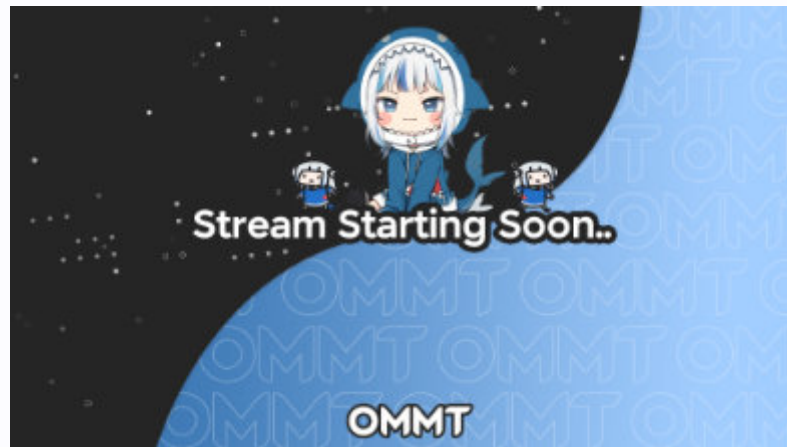

Blip Blob is a single-player bullet-hell android game where the player controls a blob to avoid their bullets and collect gems to fill up the meter to finish the level.

Notable Technologies:

Unity, C#, Adobe Photoshop, Adobe Illustrator

Various Graphic Design Works

VICTIM'S BUYING SERVICE

Yes or will help these osul and osulense tournaments:

Tournament	Price
OSU! 2019	Rp 65.000
OSU! 2018	Rp 110.000
OSU! 2017	Rp 190.000
OSU! 2016	Rp 210.000
OSU! 2015	Rp 300.000
OSU! 2014	Rp 590.000
OSU! 2013	Rp 790.000
OSU! 2012	DM me

Not a tournament organizer? Worried not we also sell **Osul Supporter** for you!

1 Month Rp 65.000
2 Months Rp 110.000
3 Months Rp 190.000
4 Months Rp 210.000
5 Months Rp 300.000
6 Months Rp 590.000
7 Months Rp 790.000
8 Months DM me

in giving **Osul Supporter** prize to tournament winners!
Use **Victim's Buying Service** for prizepool buying solution and get a discount for the purchase!

Supported payment: **Jenius** (88888888), **GO-PAY**, **OVO**
